No matter what device I try to run on I get an error message saying that this version can not run on that device. I am running on a Macbook Pro 13 inch model and I tried running it on a 5-7 year old Windows PC, another Macbook Pro 13 inch and a Macbook Air running the same version. Running on the PC on my 10.8 and 10.9 operating system works but my Mac and my Macbook air just give me an error message.
